- 28 - 29th October 2023 XVIII International Symposium of Turkish Orthodontic Society (as a part time worker) Istanbul, TURKEY

Computer Skills

- Java
- Python
- HTML
- CSS
- JS
- REST
- Microsoft Office Applications

Additional Skills and Interests

- I am primarily interested in Java-based Full-Stack Web Development and modern cloud technologies, with a focus on building scalable and efficient systems. Therefore I like to do research about different emerging telecommunications technology topics e.g. AI-Powered Network Optimization, 6G Wireless and even direct Satellite to Mobile Connectivity. Also I would like to achieve experience in the development of advanced high speed Tbps broad band network technologies (e.g. using Edge Computing or Network Slicing) I have a strong interest in AWS and cloud architectures. Therefore I aim to contribute to innovative telecom solutions by combining my Full-Stack Development skills with modern cloud-based systems.
- Outside of my professional interests, I like doing sports such as; soccer, swimming, and skiing. I love listening to different kinds of music. I can play a piano very well. I am fond of traveling to different countries.

My Targets

- Work in the software industry for the growing telecommunication world.
- Work in R&D department as a software engineer (e.g. Java Developer or Full-Stack Web Developer)
- Do my best in my job in order to create a reliable software.
- Find efficient solutions for resolving of technical problems.
- Establish a good relationships with my colleagues within the team.
